

Eve Double Pro-line

Iconic design and state-of-the-art charging technology

The Eve Double Pro-line is Alfen's smart charging solution with two sockets, optimally suited for private and semi public locations. In 2017, Alfen redesigned the Eve Double Pro-line from the ground up taking into account the latest in charging technology and the needs of EV drivers. This unit has a large display screen, improved user interface, and a new high-tech, reliable ardware platform including several features along with easy configuration and operation.

Built in protection

The Eve Double Pro-line is equipped with two Residual Current Devices of type B which ensure safety from both AC and DC residual currents. This build-in protection allows for a more cost-efficient installation.

Easy configuration

An externally accessible Ethernet Port makes it easy to connect the Eve Double Pro-line to a PC and configure the charge point with the user friendly Installer.

Smart Charging

With its redesigned soft and hardware, the Eve Double Pro-line supports various features such as smart charging networks, load balancing and OCPP 1.6.

Specifications

Charging capacity per outlet	3.7kW (16A, 230V), 7.4kW (32A, 230V), 11kW (16A, 400V), 22kW (32A, 400V)	Authorisation	Plug & Charge, RFID
Outlet	Dual type 2 socket	Colour	Front RAL9016 (Traffic white) Rear RAL7043 (Traffic grey)
Input	Single or dual feeder cable	Energy (kWh) meter	MID approved, suited for payments
Norms and guidelines	IEC 61851-1 / -22 (2017)	Dimensions (LxWxD)	590 x 338 x 230mm
